

Objectives and Targets 2007

| Objective | Target |
|--|---|
| Energy Performance of Buildings | Establish a working relationship with one or more organisations to conduct energy performance assessments and create EP Certificates for at least one trial building and one construction project (in preparation for completion) |
| Drought Order – link with construction processes objective Construction processes | Feasibility for the use of grey water within Canary Wharf managed buildings to meet drought order requirements to be established - based on conclusions from BIC |
| | Design of new buildings to accommodate grey water recovery Target - Completion of study and establishment of strategy |
| Construction site management | Establishment of Project-based site waste management plans meeting DTI requirements and using format compatible with EA template |
| Paperless Office | Reduction in the use of purchased paper through the use of software fax systems. |
| Increase in Artificial Habitats | Adams Place - to be planted out with reed beds |
| Secure cycle accommodation | Include on new construction designs Extend to additional buildings |
| Measure and reduce energy consumption in all Canary Wharf Group offices and calculate the equivalent emissions. | Install extra electricity sub-metering in Phase 1 buildings. Analyse electricity consumption. And achieve saving by end of year |
| | Possible use of fuel-cell technology. Use in buildings and vehicles. Possible use of tidal flow generators. |
| Waste management | Develop and complete new waste management strategies in conjunction with selected waste contractor Complete tendering process for contractor selection |
| Raised awareness and communication | Implementation of Global Action Plan Joint newsletter with F&LS |
| Environmental training | Create new training courses and present to all current project team on CWCL |
| Improved Trade Contractor control (CWCL) | Establish and implement KPI's on construction projects |
| Energy saving | Raise awareness and operate more "switch-off" weekends. Monitor saving |
| Greener technologies in construction | Completion of study by Hilson Moran regarding Part L2b |
| Enhanced involvement of design consultants in technologies and techniques for new buildings | Achieve low and zero carbon footprint by design. |
| Bodiversity | Establish budget for re-introducing colour into planting in 2008 Introduce phased biodiversity actions over the next 3 - 5 years Re-scope the biodiversity action plan. |
